TV STAR competition Part 1

SUPER PRIZES TO BE WON!

Here's what you have to do:

Pictures of well-known TV stars are shown below. Cut them out carefully and paste them on your gift card which is given away *free* in this week's issue.

Each square on the gift card has a clue to the star's identity and you must find the right square for each picture.

Three coloured pictures will be given away each week. When you have the complete set of 12 you will have a colourful wall chart of TV stars.

When we give away the last three pictures of the set we will also print a competition coupon which you can fill in, telling us the order in which you have placed the photographs. Then, in no more than 12 words, tell us why you like the new MIGHTY TV COMIC.

The winners of our competition will each receive a *super* prize as shown on this week's cover and the covers of the next three issues.

COMPETITION RULES

Entry for this competition is free and open to all readers in the UK and the Republic of Ireland other than relatives, agents or employees of Polystyle Publications Ltd. The editor's decision is final on all matters relating to the competition. No correspondence can be entered into. Results will be printed in a future issue of Mighty TV Comic. Competition closes Oct 31, 1976.

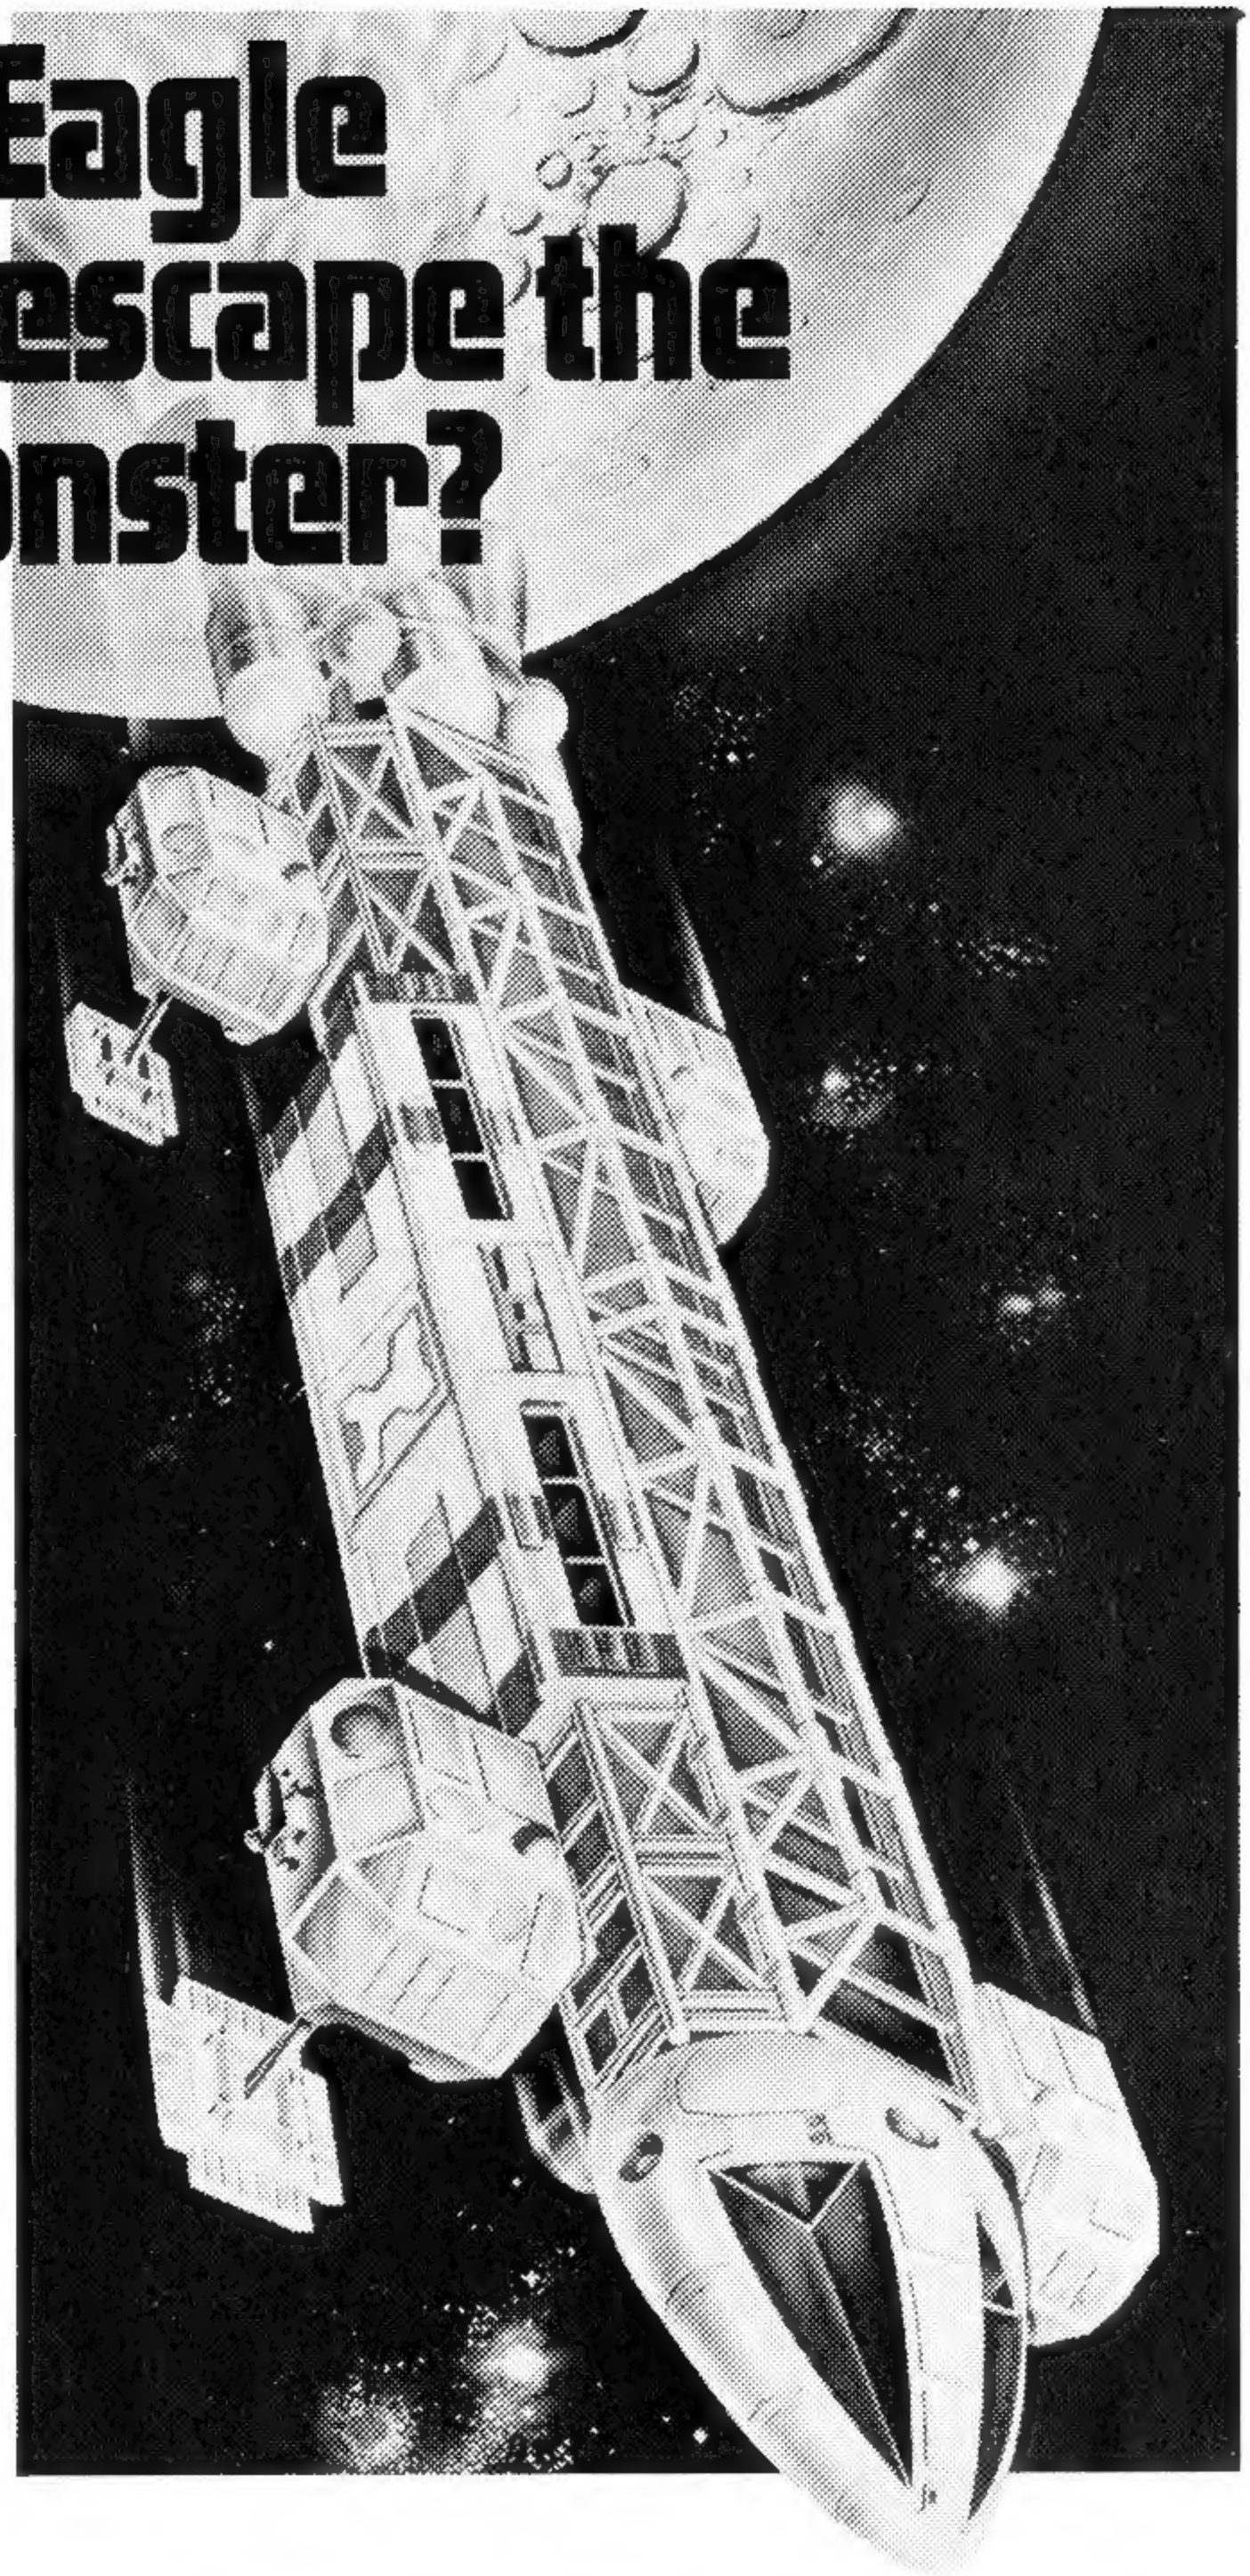
Will the Eagle Transporter escape the green monster?



Professor Bergman and Commander Koenig land on a new planet.

A figure materialises before them.

"My name is Kapitaine Morgen. I greet you in peace. Follow me."

Professor Bergman and Commander Koenig feel uneasy. They do not follow Kapitaine Morgen as he disappears through a clearing in the undergrowth.

Shimmering Tree

"Look! That tree seems to be shimmering," remarks the Professor.

"Don't touch it!" screams Commander Koenig. "Too late!" The Professor tries to examine the bark.

"It has no substance!"

"You are too clever," croaks an inhuman voice.

The Green Monster

With that the surroundings disappear and a horrible jelly-like, green monster tries to explain.

"The lush surroundings you first saw was Planet Egag a million years ago. It was just a projection of itself. You must help us. We were overtaken by an evil monster. We need to inhabit your bodies if we are to live again. Come! Come."

With that Commander Koenig and the Professor race to the Eagle transporter as the green monster tries to overtake them.

"Back to Moonbase and safety!" orders the Commander.

Your very own Airfix Eagle Transporter

Now Airfix Construction kits give you the chance to create your own Eagle transporter and hair raising adventures. The Airfix Eagle transporter kit captures all the details of the original from the exciting T.V. series Space 1999. Forty pieces go to make up the kit and they include the complex control cabin, landing pads, laser armament, missile racks and Alpha Moonbase transfers.

The Moonbase Eagles have a skeletal framework with nuclear power units aft and in the four lateral lifting bodies.

The complex control cabin at the front is known as 'the beak' and from here the craft is piloted and the systems housed.

Hydraulic landing pads enable Eagle to operate from rough terrain and sensing devices provide a fail-safe operational factor.

The Eagle's central area is capable of taking a variety of module pods or units designed to carry stores, personnel, survey equipment etc. For combat use, Eagles can be fitted with formidable laser armament and missile racks. In the Eagles, Moonbase personnel journey to other planets and endeavour to protect the colony from outside forces.

Their versatility enables them to undertake hazardous missions in the colony's search for a planet on which to establish new life.

Airfix wish you good luck in your search for a new planet!
